

COUNTY OF LOS ANGELES

PROBATION DEPARTMENT

Los Angeles County Probation COVID-19 Weekly Update #6 May 8, 2020

Juvenile Facilities

Testing of Youth for COVID-19

Juvenile Court Health Services (JCHS) began testing all new youth entering Probation facilities for COVID-19 on May 4, testing 30 youth from May 4-May 7. As a result of this enhanced testing, one youth at Barry J Nidorf Juvenile Hall and one youth at Central Juvenile Hall have tested positive for COVID-19, with both youth being asymptomatic at this time. The youth testing positive have not been exposed to the facility's general population and all youth in juvenile facilities are provided with masks.

Five youth who are not new admits have been tested for COVID-19 over the past week for displaying possible symptoms, with those youth testing negative or have results pending. A total of 51 youth have been tested for COVID-19 overall.

Care of Youth Testing Positive for COVID-19

Youth who have tested positive will be housed in a designated isolation unit. Central Juvenile Hall (CJH) has designated living unit W1 and W2 for males and living unit X and Y for females. BJN has designated living unit A and B for males and living unit T and V for females. In the event that a youth from camp tests positive, they will remain in juvenile hall and be assigned to one of the designated units. The designated living units will only house positive youth and they will be kept separate and apart from other youth until cleared by medical staff to return to a traditional housing assignment.

Reducing the Population in Juvenile Facilities

Over the period from April 30-May 8, the Los Angeles County juvenile hall population has remained stable from 358 to 357 and the juvenile residential camp population dropped from 185 to 183 over the same period. Since March 2, the juvenile hall population has decreased by 194 youth, or 35.2% and the juvenile camp population has decreased by 106 youth, or 36.6%.

The L.A. County Probation Department continues to work with the courts and legal partners on methods to safely reduce the juvenile population housed at Probation facilities.

- The following Community Detention Program protocols continue to be in place:
 - The Community Detention Program will only detain violations when a youth cuts their electronic monitoring device, is missing for more than 12 hours or commits a new crime. Otherwise they will be kept on and a report will be sent with the next court date. Detentions are not conducted as a result of failure to drug test and gang association.
 - There has been an 88% reduction in Juvenile Probation Violations from January to April.
- The Department has been screening cases in the camps to consider early release in accordance with the guidelines received. As of May 5, 131 youth have been released of which 75 cases were granted an early release by the Court through Probation's early release recommendation.
- Probation will continue to meet with Juvenile Court leadership, the Public Defender and the Alternative Public Defender to evaluate court orders.

Staff Health and Screening Measures

The Department is screening every person entering a juvenile detention facility. Those attempting to enter a juvenile hall or camp at any time are required to verbally respond if they currently have new or worsening symptoms of a respiratory illness. If the individual's response is that they are experiencing symptoms, they will be restricted from entering the facility that day. The department is also conducting infrared temperature checks on all individuals entering juvenile facilities.

Staff in juvenile facilities are wearing face coverings to protect youth and themselves. All staff who are not teleworking have been offered face coverings.

From May 1-May 8, two Probation employees have tested positive for COVID-19. Since the pandemic began, 19 Probation staff that have tested positive for COVID-19. Nine of those staff members work in Juvenile facilities, with seven working at Barry J. Nidorf Juvenile Hall and the remaining two having been on leave and not at work when they tested positive.

These employees are legally entitled to privacy and we will provide no further details at this time. For each employee who has tested positive, the County will notify potential workplace contacts, including other employees who may have been in close contact with the COVID-19 positive individual.

Currently there are no youth being isolated due to possible exposure to staff testing positive. If youth are potentially exposed, the Department has medical professionals from Juvenile Court Health Services and Department of Mental Health who would continually monitor the health and well-being of youth that are in those units including checking their symptoms twice a day.

Health Care Services

- Juvenile Court Health Services (JCHS) continues to work with Probation facility staff regarding the care of the youth in the Quarantine and Isolation units to prevent potential spread of disease.
- JCHS nurses have trained selected Probation staff at the juvenile halls and camps for the use of infrared thermometers on all staff and visitors upon entry to the facility.

Clinical resources:

A DHS Infectious Disease specialist is assigned to assist correctional facilities. He will be a clinical resource for medical staff to help workflow and answer clinical questions.

Clinics:

Workflows are continuing to be reviewed and refined as necessary to be sure that youth are being seen for necessary appointments safely. Specialty clinic appointments outside the juvenile hall are to be either made via phone visits or rescheduled as much as possible.

Telehealth

19 telemedicine workstations at halls, camps, and JCHS headquarters were deployed April 30, and training for nurses, doctors and Probation staff is being finalized on how to use the system to link all halls/camps/JCHS headquarters for assessment and consultation by medical staff and build 24/7 capacity that currently does not exist.

Releases from a Probation facility:

Any quarantined or isolated youth will need to be reviewed with JCHS to be sure that the receiving location is aware of the medical status of the youth and can maintain the appropriate level of housing for the youth. If necessary, Public Health will also be made aware as appropriate.

Staffing of Juvenile Facilities

The Department ensures that all critical security and safety posts are manned as required by the Board and State Community Standards and in accordance with the Department's Emergency Operations Plan. Contingency plans have been developed and put in place if facilities are not adequately staffed. Juvenile and Adult Field Operations have been designated to assist and have continued to report to the halls and camps since March 23, 2020.

Expanded Precautions at Institutions

In addition to efforts outlined in past updates, Probation has made additional efforts to keep youth and staff safe from COVID-19:

- The Department has issued masks to all staff and youth in juvenile halls and residential camps.
- Alcohol wipes were distributed to all facilities to ensure handheld radios are cleaned frequently.
- Probation's Management Services Bureau continue to provide janitorial services at facilities to ensure all bathrooms and staff quarters (where applicable) are cleaned daily and have readily available hand soap, paper towels, toilet paper and disinfectant. The Department has also hired additional staff to clean and disinfect common touch areas twice per shift.
- New hand sanitizer stations have been installed At Camps Afflerbaugh, Paige, Rockey, Dorothy Kirby Center and Central Juvenile Hall. Barry J. Nidorf Juvenile Hall is awaiting installation.

All Probation facilities have been instructed to conduct additional deep-cleaning efforts in high-traffic, high-volume areas, including visiting and health care facilities. Staff have also been granted permission to carry up personal-use hand sanitizer. Public Health guidelines are reinforced daily to all staff and youth of the importance of social distancing and frequent handwashing.

Procurement of PPE

Administrative services continue to purchase personal protective equipment and hand sanitizer as quickly as possible. The Department has procured 7,000 cloth masks to provide to Probation employees. Since the pandemic began, 92,000 surgical masks have been ordered and received. The Department is also awaiting shipment of 850,000 pairs of gloves. At times, scheduled deliveries do not occur because items are understandably diverted to health care providers.

Social Distancing Efforts in Institutions

- Limiting the congregation of youth to small groups of 6 or less
- Rearranging scheduled movements to minimize mixing of individuals from different housing areas
- Having a youth shower individually as opposed to several youth at a time
- Maximizing outside space during recreation
- Conducting staggered meals (having youth sit at different tables in small groups)
- Having an identified space for youth who are suspected or confirmed cases of COVID-19
- Instructing staff to comply with social distancing when coming on or off duty

- Having youth sleep head to toe in camps
- Having DMH and JCHS communicate with youth by phone when appropriate

COVID-19 Communications with Youth

JCHS presented a PowerPoint presentation to educate youth in the halls and camps about COVID-19 and the proper precautions to take while housed in the facility. Probation and medical staff were present to answer any questions or concerns the youth have about the pandemic. Town Hall meetings continue to be held to alleviate rumors and youth's anxiety in addition to reinforcing proactive personal hygiene practices such as daily frequent hand washing, coughing into the upper sleeve and social distancing. Youth continue to be advised to notify staff if they are not feeling well or are displaying any symptoms associated with COVID-19.

Communications to Clients and Families about COVID-19

Juvenile Institutional Managers are provided with daily COVID-19 updates. In addition, they continue to participate in weekly conference calls hosted by Emergency Management to share information and obtain COVID-19 updates from partner agencies. In addition, efforts to provide youth and families with COVID-19 information include:

- Posting of DPH signage outside each facility and inside the living units, restrooms, kitchen, staff sleeping quarters.
- Interagency town hall meetings with JCHS nurses to address concerns, answer questions and provide plan
- Contacting parents, and community-based organizations and advising on the cancelation of all normal visitations.
- Mailing of COVID-19 information flyers for parents and community

Youth-Parent Communications

In-person visitation at juvenile halls and residential treatment facilities remains suspended.

Virtual visits via Google Duo began in earnest the weekend of May 2. Workstations were placed at both juvenile halls to facilitate the virtual visitation. On April 30, informational letters to parents were sent out to provide information about the new video conferencing technology with instructions on how to install the application to their personal electronic devices. Additionally, as of May 1, Family Connection Rooms utilizing Los Angeles County Office of Education (LACOE) laptops in classroom settings have been implemented at all camps. Youth are still able to make free phone calls to families and are also provided with supplies for letter writing such as paper, pencils, crayons etc. The Department pays for all postage regardless of the number of letters a youth sends out.

Efforts to Address the Medically Fragile Population in Detention Facilities

The Probation Department continues to not have any youth with compromised immune systems or other medical conditions placing them at higher risk for COVID-19 infection. As previously reported, if any youth have other underlying medical conditions

which might exacerbate the impact of such infection if one were to occur, the Department will work with Juvenile Court Health Services (JCHS) to assess and address those issues on a case by case basis.

Probation Procedures for Quarantine and Isolation Due to Possible Exposure

Youth that are quarantined due to possible exposure to another youth or staff who have tested positive are separated to a different unit and the unit in question is cleaned and sanitized immediately. JCHS check on the quarantined youth symptoms twice daily and notifies management of any concerns that arise.

Mental Health Services

Probation is working with the Department of Mental Health (DMH) to implement “virtual counseling” for youth at the halls and camps through video conferencing for routine appointments at DMH kiosks. Six kiosks have been installed in DMH offices, four at BJNJH and two at CJH. The DMH Project Manager is in the process of determining a go live date at the halls. The virtual platform has been implemented at select camps, however, we will be discussing with DMH about deployment of virtual counseling at all camps.

School for Youth in Juvenile Facilities

Los Angeles County Office of Education (LACOE) efforts to provide a quality education to youth in Probation facilities during the pandemic can be found at <https://www.lacoe.edu/LACOE-Schools/Covid-19-Distance-Learning-Plan>.

Rehabilitative Programs

During this time, Probation Education Services staff continue to provide the following services for RTSB/DSB youth:

- **College Classes:** In collaboration with Los Angeles Mission College, Los Angeles Trade Technical College and Glendale Community college, students in our Juvenile Halls and Camps have the opportunity to participate in on-line UC/CSU transferable college courses. Probation Education Services provides students with the textbooks, academic support and technology necessary to be successful in the courses.
- **Youth Work Program:** In collaboration with Workforce Development and Aging Community Services (WDACS), youth will continue to gain work experience and earn a paycheck in the Camps and Halls. Youth work for an average of 120 hours which includes 20 hours of paid Personal Enrichment Training (PET) facilitated by trained Probation Education Services Staff. Each participant receives an employment transition plan upon their release from the camp or hall.
- **Book Clubs:** Education services staff facilitate multiple book clubs throughout the camps and halls.
- **R.I.S.E (Resilience and Intergroup Solidarity Education):** RISE consists of 25 small group sessions that reinforce team building, coping skills and provides conflict resolution techniques among other skills.

- **CareerSafe Certification:** This program provides on-demand training courses in the area of OSHA designed to improve workplace safety, compliance and risk management. Youth can enroll in various 10-hour courses that lead to industry recognized OSHA certificates.
- **Family Connection Rooms:** Probation Education Services provides youth in RTSB with access to computers to conduct virtual family visits.

Education Services also provides support to the following programs:

- **Youth Council:** Youth involved in the council are given the opportunity to voice their concerns and offer ideas to improve their camp programs. This allows them to gain confidence and be empowered through their decision-making. They are given the opportunity through the program to have their voices heard and make important decisions to positively impact their futures.
- **Art Programs through Arts for Incarcerated Youth Network** using distance learning strategies (conference call, cell phones, laptops)
- **Life Skills:** Budgeting, Nutrition, Conflict Resolution, Stress Management, Parenting, Basic Hygiene Practices and so many other topics are covered in our Life Skills class. Many youth have questions about various aspects of life as they transition from their teenage years into young adulthood. This class offers a flexible curriculum to provide the instructor the opportunity to provide instruction relevant to what the youth are interested in learning about in that moment. This Montessori style approach meets the youth where they are, and increases the likelihood of retained interest and engagement in the material

All programming facilitated accounts for social distancing and small group settings.

Virtual Court Hearings

Video Court for the halls continue to operate effectively. Additionally, 730 evaluations ordered by the court are also being conducted successfully via video conferencing. A youth that needs to attend court but is in a quarantined unit will not be transported to court. The youth will also not be using a Virtual Court workstation. The unit staff will need to work closely with the Virtual Court Coordinators and the youth will be allowed to phone in to the virtual hearing from his or her quarantined unit.

Living arrangements for Youth upon Release

By law, Probation must always take steps to avoid release of youth to homelessness. All releases continue to happen in consultation with a parent/caregiver or, where none is available, the Department of Children and Family Services (DCFS) or Probation Placement.

Beginning with the initial MDT, the youth's transition plan into the community is discussed. If the youth is under the care of DCFS or has a history of being in suitable placement, the youth is flagged to ensure their transition plan includes housing, in consultation with DCFS and/or Probation Placement. If the youth is set for family reunification the home is assessed by the field DPO. If the home is deemed unsuitable, the transition officer will work with placement to find a relative. If placement is the only

option, the youth is referred to Residential Based Services to start the interagency screening and the camp facilitates the interview.

If the youth is over 18, and the youth has previous placement, youth will qualify for AB12 and/or Independent Living Program. Most times the court will terminate probation and the youth will be placed in transitional bed with the Housing Authority, but at the very least go to a shelter.

Suitable Placement

- Probation is expediting the movement of youth from Juvenile Hall to Probation Assessment Centers for youth pending new suitable placement or replacement orders.
- Continued face to face contacts with youth placed in Short Term Residential Therapeutic Programs (STRTPs), with Resources Families (relatives/non-relative homes). Also, non-minor Dependents placed in Foster Care through Transitional Housing Programs and Supervised Independent Living Programs.
- Probation contracts with the Department of Public Health to provide nurses and health services for youth in suitable placement, including COVID-19 screening and services if needed.
- Providing mutual aid to other Probation Departments throughout the state by providing face to face contact with youth who have been placed in STRTPs in the County of Los Angeles.
- Continued participation on the weekly County Leadership call with STRTP Leadership to proactively work through potential issues that might surface for staff and/or youth as a result of being exposed to or contracting COVID-19.

Juvenile Services Field Division

- Monthly telephone contact with all juvenile probationers.
- Weekly contacts with High-Risk Offenders, specifically the Intensive Gang Supervision Program.
- Providing assistance and informational pamphlets/guides to families unable to travel to obtain food items from food centers as set up by various school districts and other community resources.
- Currently surveying youth/caregivers to determine the barriers for youth unable to connected with an academic program with an eye toward connecting youth to or providing the necessary resources to engage in academic programming.
- Court Officers continue to report daily to juvenile court departments.
- Citation Diversion Court hearings postponed until further notice.
- Confirming educational needs of youth on field probation are being met via distance learning.

Adult Division

Field Probation COVID-19 Precautions and related activities

Area offices remain closed to the public. Deputy Probation Officers continue to maintain contact with probation clients by phone, email and videoconference. Clients are encouraged to reach out to their assigned probation officer as well. The Department continues to conduct field visits and is prioritizing cases where there are vulnerable victims, sex offenders, and any other circumstances that are considered high risk or require special attention. In addition to conducting safety checks, officers are providing COVID-19 Public Health information and resources. Additionally, the Department released a notice instructing adult field DPOs to work with clients experiencing financial difficulty as it relates to fines and fees.

Adult Field Services is working with the California Department of Corrections and Rehabilitation to facilitate the release of inmates back to Los Angeles County and is collaborating with the Sheriff's Department to assist in clearing the inmates for possible release. Probation is working with the California Department of Corrections and Rehabilitation and the Los Angeles County Sheriff Department to process these individuals and assist with appropriate orientation, addressing housing and other emergent needs.

The Adult Division is also doing a special outreach to probationers who fall within the vulnerable/high risk age group and may have preexisting health conditions, including the 645 adult clients 65 and over. The outreach is to provide information as published by the county and other subject matter experts and to encourage them to take care of themselves.

As of May 8, 2020, CDCR has released 591 individuals to L.A. County, and 475 have reported to post release supervision. The Probation Department has enhanced its services to stabilize their reentry into the community to ensure basic needs are met including shelter.

Deputy Probation Officers assigned to the Adult Division also continue to support the staffing in juvenile institutions.
